Pediatric Clinical Neuropsychologist Position
Learning and Emotional Assessment Program (LEAP)
Massachusetts General Hospital and Harvard Medical School

We are pleased to announce an immediate opening for a **full-time pediatric clinical neuropsychologist position** at the Learning and Emotional Assessment Program (LEAP) within the Department of Psychiatry of Massachusetts General Hospital (MGH) in Boston, MA.

LEAP specializes in the assessment of neurodevelopmental disorders in children and adolescents ages 2-22, emphasizing a collaborative and holistic approach that engages the child, family, and referring provider. Patients are referred by pediatricians, child psychiatrists and psychologists, and child neurologists.

The pediatric neuropsychologist will provide evaluations of our youngest patients, ages 2-5, who typically present with complex needs. Experience and/or training in the assessment of diverse populations and autism spectrum disorder is required. The clinician will play a significant role in training, including supervision and teaching of child psychology interns and pediatric neuropsychology postdoctoral fellows.

While clinical care and training will be the primary responsibilities, LEAP has a well-developed and integrated clinical research program. All faculty can collaborate on research projects without the need to secure their own research funding and/or can pursue independent research opportunities.

The position offers a competitive salary and generous benefits. In addition to a staff appointment at MGH, there will be an academic appointment at Harvard Medical School (HMS). Rank will be commensurate with experience but is expected to be at the Instructor level.

Candidates should be board-certified or eligible for ABPP board certification in clinical neuropsychology and subspecialty certification in pediatric neuropsychology. Candidates must have completed a doctoral degree in clinical or school psychology from an APA/CPA accredited program and an APA/CPA accredited pre-doctoral internship. Prior to the start date, the candidate must have also completed a formal two-year postdoctoral fellowship or equivalent in pediatric or developmental neuropsychology, and be licensed in the State of Massachusetts.

To apply, please email a letter of intent, CV, 2 letters of recommendation, and 2 de-identified pediatric neuropsychological assessment reports to Sarah Mancuso (smancuso@mgh.harvard.edu). Interviews will be conducted on a rolling basis until the position is filled, beginning in May 2023. Questions and correspondence should be addressed to LEAP's Director, Molly Colvin, PhD ABPP (mcolvin@mgh.harvard.edu).
